

SIPPS Psychopy workshop

7/27/23

Who am I?

- I'm Ben (shameless plug: Benjamin-silver.com)
- 5th year PhD student working with Kevin Ochsner
- Research interests: motivated cognition, impression formation/updating, internet behavior
- Non-research interests: Science writing and science outreach
- Who are you?
 - Name, year
 - How well you were able to follow the Psychopy tutorial, 1-5 scale

What's up today?

- Brief review of asynchronous video
- Breakout rooms activity
 - Don't hate me, embrace it
- Present breakout rooms work

What is Psychopy?

- Review of asynchronous video content
- Screen share
- ASK QUESTIONS!

Break into groups to create an experiment

- Group 1: Do people like dogs or cats more?
- Group 2: Does color impact reaction time?
- Group 3: How do people respond to ethical dilemmas?
- Think about the following:
 - What are your experimental stimuli? How will you display them?
 - How will you record responses?
 - How can you make the experiment easily scalable to a full study?
- You might not finish; that's okay
- Work together!

Present

- Share your screen and show us your experiment and how you built it
- What was the most difficult part?
- What's something you still want to know how to do?
